

AHMED M. SOZZER

ahmedsozzer9@gmail.com — amsozzer.com — github.com/Amsozzer1 — linkedin.com/in/amsozzer1 — Austin, TX

Education

University of Illinois Urbana-Champaign

Bachelors in Computer Science

May 2025

Experience

FYCLabs

Remote

Full Stack Engineer (Frontend, Backend, CI/CD)

May 2025 - Present

- Work directly with client founders, C-suite, and end users to scope requirements and surface pain points, then translate them into shipped features
- Build and ship full-stack applications for early-stage startups end-to-end, taking product concepts to production with Next.js, React, TypeScript, PostgreSQL with Prisma, and GCP infrastructure
- Build cross-platform mobile apps in React Native from Figma designs, owning the full API layer and database modeling
- Engineer CRM integrations against client backends (GoHighLevel, Zoho, HubSpot) via REST APIs and webhooks, cutting manual data operations by 60%
- Build automated CI/CD pipelines on GCP with comprehensive testing, reducing deployment cycles by 70% and maintaining 95%+ reliability across multiple concurrent client projects
- Optimize backend and database performance to scale from 700 to 5000 active users, improving query efficiency and horizontal scalability across distributed GCP infrastructure

Holiday Channel

Colorado Springs, CO

Full Stack & iOS Developer

Jan 2025 - May 2025

- Built an e-commerce platform that improved customer retention by 20%
- Designed microservices infrastructure to handle 200% traffic surges during peak holiday periods
- Integrated Google Ads and built responsive interfaces from Figma designs using Shadcn and Framer Motion, increasing conversion rates by 28%

Luminii LLC

Niles, IL

Data Analyst and Software Intern

May 2024 - Aug 2024

- Built an ML-driven pricing system on real-time supplier data to adjust component costs, reducing manual re-calibrations by 40%
- Implemented ML pricing models with the team, improving price competitiveness by 25% in target markets
- Improved site performance via lazy loading, image compression, and code minification, cutting average page load times by 30% across devices
- Reindexed a 15,000+ record database, improving query performance by 65% with automated data validation

Skills

Languages: Python, C/C++, JavaScript/TypeScript, Java

Frameworks: React, Next.js, Node.js, Express, React Native, GraphQL, TailwindCSS

Databases & Cloud: PostgreSQL, Prisma, MongoDB, Redis, GCP, Firebase, Docker

Practices: REST APIs, Webhooks & Integrations, CI/CD, Microservices, System Design

Tools: Git, Jest, Cypress, Postman, Linux

Projects

PlusWeb — C++ HTTP Server Framework (WIP) — [Repo](#)

- Building an Express-style C++ web framework (`app.GET`, `app.use`) from raw sockets that abstracts socket and connection management; thread-pool concurrency with HTTP keep-alive (epoll event-loop refactor in progress)
- Designed a segment-trie router with parameterized routes (`/user/me` vs `/user/:id`) resolved by exact-match-over-parameter precedence, plus mountable sub-routers
- Implemented a composable middleware chain with `next()` continuations and relative-path rewriting for nested routers, with JSON request/response handling

Real-Time Communication Platform — [Link](#) — [Front End](#) — [Back End](#)

- Developed a full-stack web app featuring real-time messaging with WebSockets, video calling via Stream SDK, and user authentication through Firebase
- Engineered a responsive React frontend with custom UI components and a Node.js/Express backend handling concurrent WebSocket connections with <100ms latency
- Enhanced cross-browser compatibility for WebRTC video calls and deployed on Render with 99.9% uptime

Publications & Presentations

- Created research paper on mentor-mentee matching algorithms selected for review by the American Society for Engineering Education (ASEE), with positive feedback from editorial board — [Link](#)
- Presented mentor-matching research at the 2023 John S. Albazi Student Research Symposium at NEIU — [Link](#)
- Showcased mentor-matching app research at Wright College's Fall 2022 Student Research Colloquium — [Link](#)
